## GLOBAL QA

Corpac's own skilled QA team inspects and oversees quality at every step. From mill through delivery, our skilled engineers, manufacturers and logistics experts work together to ensure integrity, compliance and timely delivery.

## TURNKEY SOLUTIONS

Our comprehensive inventory and global network of mills enable us to fulfill your requirements with immediate availability for a wide range of sizes and grades, as well as to provide global mill sourcing for specialized projects.

## SPECIAL SERVICES

We provide coatings, galvanizing, beveling, threading, slotting, cut-to-length, bends, quench and temper, fabrication, doublejointing and on-site assistance.

## CROSSOVER DISTRIBUTION MODEL

Corpac provides a range of services spanning the global supply chain by integrating the roles of manufacturers, trading companies, distributors and logistics providers.

## SUPPLY CONTRACTS <br> JUST IN TIME PROGRAMS

We design these predetermined delivery schedules specifically for each customer, to meet product flow, while safeguarding on-site stock depletion and minimizing storage space and costs. Deliveries can be set to single, multiple or roving locations based on project needs.

ISO 9001:2015 -ISO/TS 29001:2020
Distribution Management System Certified

Supplying the midstream industry with products and solutions to build critical infrastructure requires more than pipe and steel.

Corpac's wide range of products comes with decades of experience, industry expertise and an unwavering commitment to quality. Our tubular inventories and solutions meet the rigorous demands of today's transport environment for oil, gas and other natural resources.

Corpac's line of Energy Tubulars includes carbon and alloy products for midstream operations, manufactured in accordance with international standards and specifications.

Corpac supplies welded and seamless API 5 L grades through X 100 for high-pressure applications, including Sour Service Solution A or B, in a range of lengths and surface and end finishes.
