

GLOBAL QA

Corpac's own skilled QA team inspects and oversees quality at every step. From mill through delivery, our skilled engineers, manufacturers and logistics experts work together to ensure integrity, compliance and timely delivery.

TURNKEY SOLUTIONS

Our comprehensive inventory and global network of mills enable us to fulfill your requirements with immediate availability for a wide range of sizes and grades, as well as to provide global mill sourcing for specialized projects.

SPECIAL SERVICES

We provide coatings, galvanizing, beveling, threading, slotting, cut-to-length, bends, quench and temper, fabrication, double-jointing and on-site assistance.

CROSSOVER DISTRIBUTION MODEL

Corpac provides a range of services spanning the global supply chain by integrating the roles of manufacturers, trading companies, distributors and logistics providers.

SUPPLY CONTRACTS

JUST IN TIME PROGRAMS

We design these predetermined delivery schedules specifically for each customer, to meet product flow, while safeguarding on-site stock depletion and minimizing storage space and costs. Deliveries can be set to single, multiple or roving locations based on project needs.

Leveraging over 25 years of unparalleled service in line pipe and other tubular products, Corpac Steel now provides valves, fittings, flanges, and other components to provide our customers with a one-stop PVF solution.

Leaning on our roots of strong customer service and quality, we are now pleased to offer the following products to our customers.
